BUILDING SPACES WITH PURPOSE

ZAYKEN PROJECTS

Zayken Projects is an Oman-based design and build company delivering interior fit-out, joinery, MEP and maintenance solutions. We transform concepts and requirements into functional, high-quality spaces, managing every stage from planning and coordination through execution and handover.

Our strength lies in bringing people, expertise and processes together as one coordinated team. With experienced professionals and established systems, we ensure every project is executed with precision, delivered on time and built around the specific requirements of our clients.

DESIGN & BUILD

At Zayken, we deliver interior fit-out solutions tailored to the requirements of each project, from bespoke fit-outs across entire buildings to detailed finishing works within individual spaces.

We provide comprehensive fit-out services for retail, restaurants and offices, covering joinery, furniture, drywall partitions, gypsum and metal ceilings, civil works and solid-surface fabrication.

Our technical expertise extends to glazed walls, partitions and doors, stainless steel and aluminium fabrication, and architectural cladding using aluminium, glass, marble, wood, granite and mosaic. Our engineering team also manages electrical, fire-fighting and air-conditioning systems, including installation, inspection, commissioning and related works.

MAINTAIN & REFURBISH

Spaces need to perform long after they are delivered. Zayken provides ongoing solutions to help maintain, upgrade and restore interiors as requirements evolve.

Our services include preventive maintenance, repairs, upgrades and refurbishment, helping clients preserve the quality, functionality and performance of their spaces over time.

From targeted repairs to larger refurbishment works, we provide a coordinated approach focused on reliability, quality and minimal disruption.
